NOTES:

-- Most mutual funds and ETFs change their fees and trading strategies relatively little over time. Because investment expenses, trading/turnover costs, fund maturity, and operating efficiency account for 80% of the Fund Authority Score rating system, Fund Authority Scores tend to remain relatively stable over time for such consistent investment funds.

-- The date in the table above indicates when fund information was accessed from SEC EDGAR filings and/or the fund company website. Normally, data used to develop Fund Authority Scores rely upon reporting periods ending the previous calendar quarter or half year.

-- Unless otherwise stated, there are no business arrangements of any kind between *The Skilled Investor* and any financial product, service, or company that may be discussed in our publication's articles.

-- Fund Authority Scores are developed on a fund by fund basis. Just because a mutual fund or ETF has a high Fund Authority Score does not mean that other funds from that fund family do, as well. On your own, always be careful to check current management expenses, sales loads, portfolio turnover, fund maturity, fund size, fund performance, and other current factors before investing in any diversified investment fund.

-- If you do not need and/or are unwilling to pay the direct and indirect costs of an investment counselor, stock broker, or other financial advisory intermediary, you should note that many mutual funds can be purchased directly from diversified investment fund families by accessing their websites or by calling their customer service telephone numbers. Similarly many ETFs can be purchased with lower transactions fees through discount brokers. (See these articles: [Payment of Investment](#)
